

## **Freedom House Phase III Transitional Housing**

### **Admission Criteria**

1. Freedom House Transitional Housing provides a supportive community living option in a single family home setting for men in recovery from alcoholism and/or drug addiction. Therefore the need for additional supportive housing is the first requirement for admission.
2. Freedom House Transitional Housing requires a willingness on the part of the referral to commit to an ongoing recovery process and attend recovery support meetings.
3. Freedom House Transitional Housing requires the referral to be a minimum of at least 18 years of age and not attending high school.
4. Freedom House Transitional Housing requires referrals to secure and maintain full time employment during their stay (or attend school or other structured activity). Therefore, referrals must be ready, willing, and able to participate in these types of activities.
5. Freedom House Transitional Housing may require referrals to secure blood tests, medical exams, communicable disease testing, and others that may be added as a result of the pre-admission interview prior to admission.
6. Freedom House does not accept referrals who cannot function independently or who are in need of residential treatment for substance use and/or mental health disorders.
7. Freedom House Transitional Housing does not accept referrals that are on certain drug therapies; this is evaluated on a case by case basis.
8. Freedom House Transitional Housing requires referrals to pay for all medical and other health needs during their stay.
